

CardScan[®]

FOR SALESLOGIX

Version 4.1

CardScan for SalesLogix

CardScan for SalesLogix is the fastest, easiest, most accurate way to enter leads and contacts into your SalesLogix database. It maximizes your efficiency with such features as:

- Capturing records by scanning business cards and importing existing CardScan files and text files.
- Creating records simply by dragging and dropping data from emails, vCards, and other documents directly into the CardScan window.
- Adding other data that may be required to create Leads, Contacts, and Accounts.
- Associating contacts with existing accounts, as well as creating new accounts.
- Verifying the data accuracy and completeness, and preventing duplicate entries.

NOTE TO ADMINISTRATORS: For all administrative functions, see the *CardScanProAdmin.chm* Help file on the CardScan for SalesLogix CD-ROM.

System Requirements

CardScan for SalesLogix requires the following:

- Microsoft® Windows® 2000, XP Professional, or Vista
- Internet connection
- Pentium® P1 processor or later
- 128 MB RAM or greater
- 100 MB disk space
- CD-ROM drive
- USB port for scanner connection
- CardScan scanner – 700c or later

Installing CardScan for SalesLogix

IMPORTANT: Install the CardScan for SalesLogix software before connecting the scanner to your computer.

To install the software

- 1 Locate the software Product Key on the CD-ROM package. You will be prompted for this number during installation.
- 2 Log on as Administrator or to an account with Administrator privileges.
- 3 Insert the CardScan for SalesLogix CD-ROM.
If the CardScan for SalesLogix installation program does not start automatically, choose **Start→Run**, enter **D:\setup.exe** (where D is the letter of your CD-ROM drive), and click **OK**.
- 4 Follow the on-screen instructions to finish installing CardScan for SalesLogix.

To install the scanner

- ▶ Plug the scanner's USB cable into the computer's USB port after you install the software.

To install the Administrator application

- 1 Choose **Custom** in the Setup Type window and click **Next**.
- 2 Add the **Administrator** component and continue with the installation.

NOTE TO ADMINISTRATORS: For information regarding silent installation, refer to *CardScan for SalesLogix Silent Install.doc* on the CardScan for SalesLogix CD-ROM.

Activating CardScan for SalesLogix

You have a 30-day grace period to activate CardScan for SalesLogix. CardScan may be activated over the Internet or by telephone, if you do not have Internet access. If you do not activate CardScan within the grace period, you will no longer have access to the software.

Users must activate their own copy of CardScan. When the maximum number of activated users reaches the license limit, no other users will be able to activate CardScan. You must contact CardScan Technical Support to obtain additional activations.

Getting Started

Depending on which CardScan scanner you are using, you may need to calibrate the scanner on your first CardScan for SalesLogix startup.

To scan your first business card

- 1 Choose **Start→Programs→CardScan→CardScan for SalesLogix**. The CardScan for SalesLogix window opens and displays the Calibrate dialog box (only for the CardScan 700c scanner).
- 2 If you have a CardScan 700c scanner, follow the on-screen instructions for calibrating the scanner. If you have a CardScan 800c scanner, you do not have to calibrate the scanner.
- 3 Check the Status line at the bottom of the window. If the scanner is connected properly, the Status line reads: **Ready to scan. Please insert card.**
- 4 Begin scanning by inserting a business card into the scanner. The scanner scans the card and displays the Scanning Options dialog box.

Information and Support

- For **Online Help**, press **F1** or choose **Help→Contents**.
- For the **ReadMe** file, choose **Help→View ReadMe**.
- For **Online Support**, click **CardScan Support** on the Help menu bar.
